Changelog

Date	Description of Changes	Relevant Notes
Ex) Day 1	Created a Duplicate copy of the sheet for cleaning	
	Observed the range of the data	- the dataset set has 14 Columns and 104 Rows including a Header row.
	Created a filter highlighting the range of the data	
	Checking each column for Nulls using "is empty" condition - Brand	- no nulls found; many non-US sold brands included
	Checking each column for Nulls using "is empty" condition - Model	
	Checking each column for Nulls using "is empty" condition - Accel	
	Checking each column for Nulls using "is empty" condition - TopSpeed	
	Checking each column for Nulls using "is empty" condition - Range	
	Checking each column for Nulls using "is empty" condition - Efficiency	
	Checking each column for Nulls using "is empty" condition - FastCharge	- cross referencing with fields in RapidCharge column indicate non-valid value was appropriate
	Replaced "-" values in FastCharge column with "N/a"	- 5 records were changed
	Checking each column for Nulls using "is empty" condition - RapidCharge	
	Checking each column for Nulls using "is empty" condition - PowerTrain	
	Checking each column for Nulls using "is empty" condition - PlugType	
	Checking each column for Nulls using "is empty" condition - BodyStyle	
	Checking each column for Nulls using "is empty" condition - Segment	- no Nulls; unsure what the records in this column mean
	Checking each column for Nulls using "is empty" condition - Seats	
	Checking each column for Nulls using "is empty" condition - PriceEuro	
	Checked for Duplicates using Data Cleanup under the Data tab	- no duplicates were found
	Removed Whitespace using Data Cleanup under the Data tab	- no available whitespace to trim
	Converted all values in Model column to Plain text	- since some models contain only numbers, there were incorrectly formatted as number values in a string column
	Created a new column to covert Accel column from 0-100 km/hr acceleration to 0-60mi/hr	- divide value in Accel column by 1.0356 to get an estimated 0-60 mi; found conversion rate by using calculations including 100 km = 62.1371 mi; an issue occurred since Accel column contains string values
	Removed "sec" and trimmed whitespace from Accel column, formatted to numbers & renamed to AccelSec_Km	- Conversion from AccelSec_Km to AccelSec_Mi was now succesful; maintained two decimal places to mimic original column
	AccelSec_Km column was hid	
	Removed "km/h" and trimmed whitespace from TopSpeed column, formatted to numbers & renamed to TopSpeed_Km	- following the above steps resulted in no issues
	Created a new column to convert TopSpeed column from km to mi	- multiplied by conversion rate which in this case is 0.62; maintained no numbers after the decimal place
	TopSpeed_Km column was hid	
	Removed "km" and trimmed whitespace from Range column, formatted to numbers & renamed to Range_Km	
	Created a new column to convert Range column from km to mi	- multiplied by conversion rate which in this case is 0.62; maintained no numbers after the decimal place
	Range_Km column was hid	
	Removed "Wh/km" and trimmed whitespace from Efficiency column, formatted to numbers & renamed to Efficiency_Km	
	Created a new column to convert Efficiency column from Wh/km to Wh/mi	- multiplied by conversion rate which in this case is 1.60; maintained no numbers after the decimal place
	Efficiency_Km column was hid	
	Removed "km/h" and trimmed whitespace from FastCharge column, formatted to numbers & renamed to FastCharge_Km	

Changelog

	Created a new column to convert FastCharge column from km/hr to mi/hr	- used the same conversion as the Accel column; maintained no numbers after the decimal place
	#Value error addressed using IF function to bypass nonnumerical records	- 5 records had "N/a" in FastCharge_Km column
	FastCharge_Km column was hid	
	Custom Formatted the Accel_Mi, TopSpeed_Mi, Range_Mi, Efficiency_Mi, FastCharge_Mi columns to include the units in each record	- will not affect calculations b/c the units are understood to be a separate string
	Created a new column to convert PriceEurocolumn to PriceDollar	- current currency exchange as of date show 1 euro = 1.10 dollars; manintained no decimal numbers
Ex) Day 2	Removed Segment column	- market segment not useful to analysis; lack of context from datasource
	Removed PlugType column	- not useful to current analysis
	Duplicated sheet to perform basic statistics in separate sheet	
	Created a Stats column to measure descriptive statistics for value columns	- FastCharge_mi values resulted in error since some fields contain "N/a" string; Mean, Median, Mode, Min, Max, & Stddevp obtained for quantitative columns; Mode obtained for qualitative columns
	Used an IFERROR function to bypass string fields	- resulted in stats being obtained
	Used scatterplots to check for outliers in quantitative data columns	- outlier on AccelSec_Mi column that would affect stats
		- outlier on TopSpeed column that would affect stats
	Created a table out of the dataset to sort & filter	
	Performed bivariate analysis on Brand vs. average PriceDollars	- Pivot Table plus Chart created for visualization
	Performed bivariate analysis on BodyStyle vs. average PriceDollars	
	Performed bivariate analysis on PowerTrain vs. average AccelSec	- felt unnecessary to create chart for this Pivot Table

EDA

Data Source

Downloaded the dataset from Kaggle with source credits to ev-database.org/; data was last updated four years ago with no plans for a future update

Kaggle License is CC0: Public Domain; the purpose of this dataset is to practice cleaning and exploratory data analysis

Raw Data

Raw data shows 103 rows & 14 columns

Included fields: Brand, Model, Accel(Acceleration), TopSpeed, Range, Efficiency, FastCharge, RapidCharge, PowerTrain, PlugType, BodyStyle, Segment, Seats, PriceEuro

Qualitative data: Brand, Model, FastCharge, RapidCharge, PowerTrain, PlugType, BodyStyle, Segment

Quantitative data: Accel, TopSpeed, Range, Efficiency, Seats, PriceEuro

RapidCharge field includes "Rapid charging possible" & "Rapid charging not possible" records

PowerTrain field includes "Front Wheel Drive", "Rear Wheel Drive", & "All Wheel Drive" records

Seats field "2", "4", "5", "6" & "7" records

Price field includes a min value of "18,299", a max value of "195,455" & a mean value of "50,738"

Stats tab includes this data plus more for each quantitative field and some applicable qualitative fields

Clean Data

Outlier in AccelSec column that affects Mean for variable

Outlier on TopSpeed column that affects Mean for variable

Top 5 Brand/Model for best in AccelSec (smallest numerical) include 3 Tesla Models, 1 Porsche, and 1 Lucid

Top 5 Brand/Model for best in TopSpeed (largest num) include 3 Tesla Models and 2 Porsche Models

Top 5 Brand/Model for best in Range (largest num) include 3 Tesla Models, 1 Lucid, and 1 Lightyear

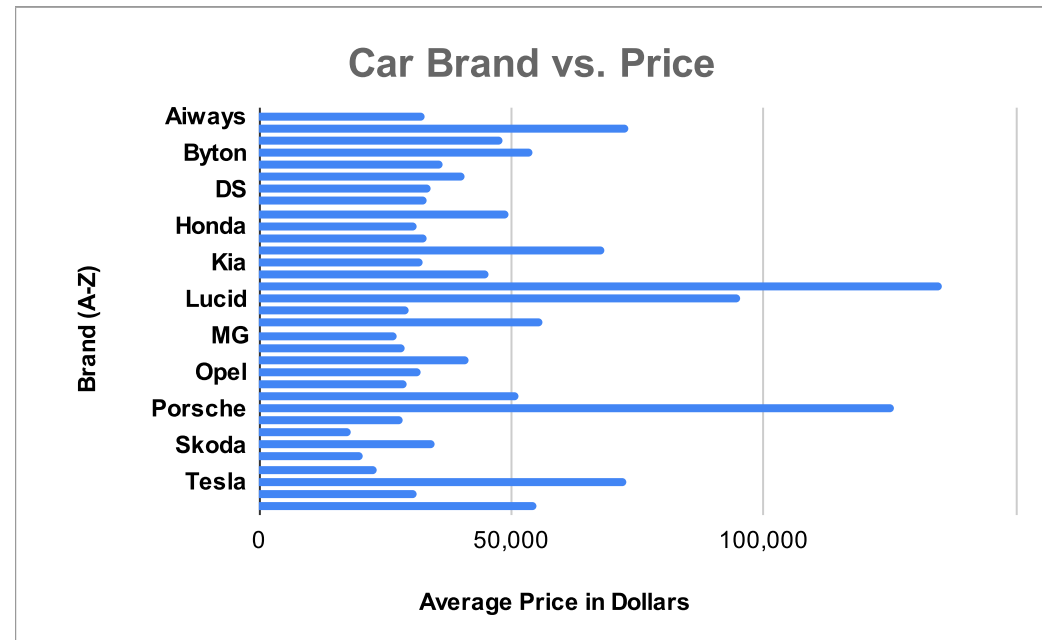

Top 5 Brand/Model for best in Efficiency (largest num) include 2 Tesla Models, 2 Audi, and 1 Mercedes

Top 5 Brand/Model for best in FastCharge (largest num) include 5 Tesla Models

Top 5 most expensive Brand/Model for price (largest num) include 3 Porsche Models, 1 Tesla, and 1 Lightyear

Top 5 least expensive Brand/Model for price (smallest num) include 2 Smart Models, 1 SEAT, 1 Volkswagen, and 1 Skoda
